

**Asunto:** [Evntech] GMVA Call for Proposals 2 August 2021

**De:** Eduardo Ros <prof.eduardo.ros@gmail.com>

**Fecha:** 2/7/21 8:28

**Para:** evntech@jive.eu, ivsmail@lists.nasa.gov, vlbi@nrao.edu

CALL FOR PROPOSALS

GLOBAL 3mm VLBI ARRAY

Deadline: 2 August 2021

VLBI proposals for observing at 3mm wavelength (86 GHz) using:  
the VLBA, GBT\*, EFFELSBURG, PICO VELETA, NOEMA, ONSALA,  
METSÄEHOVI, YEBES, and KVN telescopes should be submitted by

2 AUGUST 2021 (UT 21:00)

=====

GMVA proposals submitted by the 2021 August 02 deadline will be considered for scheduling in 2022 Session I (Mar 31 - Apr 05), or later sessions.

\*\* GMVA proposals requesting the phased ALMA telescope should not  
\*\* be submitted at the 02 Aug 2021 (semester [2022A](#)) deadline.

=====

| ALL PROPOSALS SHOULD BE SUBMITTED USING |  
| THE NRAO PROPOSAL SUBMISSION TOOL (PST): |  
| <https://my.nrao.edu> |

=====

Complete information on the GMVA is available at the GMVA website. Ongoing special considerations are documented in the GMVA section of the [VLBA Observational Status Summary](#); new features and/or special cases are cited here.

The use of the [PST](#) requires registration by all proposers, including co-investigators, in the NRAO User Database.

The GMVA will record at the highest bitrate which instrumentation and resources permit. All telescopes will record at 4096 Mbps.

All data will be correlated at the [Bonn DiFX software correlator](#).

\* The GBT may be requested for GMVA observations if a sufficiently compelling justification is given in the proposal but the amount of time available has been reduced.

KVN must be specified by entering "KVN" as "Other" entry in the PST.

For further details on proposing, including the possibility of additional support observations at 7mm (43 GHz), please consult the administrative and technical information hosted at the MPIfR:

<http://www3.mpifr-bonn.mpg.de/div/vlbi/globalmm>

Best regards,

Eduardo Ros  
European GMVA Scheduler
